SUMMARY

Mobile App Developer with **5+ years of experience in Flutter and cross-platform app development**, delivering high-performance, user-friendly mobile solutions across Android and iOS. Specialized in **state management, performance optimization, and scalable app architecture**, with hands-on experience integrating **AI-driven features** such as personalized recommendations, learning pathways, and text-to-speech automation. Recently expanded expertise into **Google Cloud Platform**, enabling end-to-end ownership from app development to deployment and infrastructure. Recognized for building secure, intuitive applications that enhance user experience and drive measurable business impact.

WORK EXPERIENCE

Software Developer | Terra.do — Oct 2021 – Present

- Developed and scaled core **Terra.do app features** including chat system, post creation, and community interactions, ensuring smooth real-time communication and engagement.
- Integrated **AI-powered course recommendations** that analyze user profile, interests, and learning history to surface the most relevant courses, improving course discovery and enrollment rates.
- Built **personalized AI learning pathways** that dynamically generate a tailored sequence of courses for each user based on their goals and skill gaps, boosting engagement and completion.
- Automated **course content to Text-to-Speech (TTS) audio** conversion pipeline, enabling on-the-go listening and significantly improving accessibility and content consumption.
- Implemented a **face recognition** module for a school app using a third-party library, matching **1,000+ stored faces locally within a couple of seconds**, delivering high accuracy without cloud dependency.
- Architected apps with **Bloc & GetX state management**, ensuring robust, scalable, and smooth UI/UX across Android & iOS.
- Owned **end-to-end release cycles** (TestFlight, Play Store, App Store) with zero-downtime rollouts and efficient version control.
- Automated **third-party integrations** (MixPanel, Firebase, Sentry, Intercom, RudderStack, Flagsmith, ShakeBugs) for analytics, crash reporting, and feature flagging.
- Collaborated in **Agile teams**, participating in sprint planning, roadmap execution, and feature discussions.

Flutter Developer | Universe Technologies — Feb 2021 – Oct 2021

- Developed and maintained **Flutter Applications and Flutter Web Applications**, delivering multiple cross-platform projects with consistent on-time releases.
- Led the **Ionic → Flutter migration**, improving maintainability, performance, and cross-platform compatibility.
- Implemented Flutter app **flavors for multi-environment builds**, reducing deployment complexity and accelerating release speed by 40%.
- Optimized app performance by **25%**, ensuring smoother user experiences through bug resolution and code improvements.
- Integrated backend services using **Firebase & Firestore**, ensuring secure **real-time data sync**.

EDUCATION

Bachelor of Computer Application | Veer Narmad South Gujarat University, Surat, Gujarat — **2017 – 2020**

ADDITIONAL INFORMATION

- **Mobile App Development:** Flutter (Bloc, Provider, GetX), Flutter Web
- **Web Development:** ReactJS, Node.js, Flutter
- **AI Integrations:** AI-based recommendation systems, personalized pathway generation, Text-to-Speech (TTS) automation, LLM API integration (OpenAI / Gemini)
- **Backend & Databases:** Firebase (Firestore, Realtime Database), SQL, NoSQL
- **Cloud & Infrastructure:** Google Cloud Platform (GCP) – VPC, Load Balancer, Firewall, VM, Pub/Sub, Cloud Functions
- **CI/CD & DevOps:** GitHub Actions, Buddy, Codemagic
- **Third-Party Tools & Integrations:** GetStream, Flagsmith, Sentry, Adjust, ShakeBug, Intercom, MixPanel, RudderStack
- **App Release & Deployment:** Play Store, App Store, TestFlight, APK & IPA builds, Flutter App Flavors
